

Reporte Oficial de Mantenibilidad y Deuda Técnica

Análisis Post-Refactorización (Arquitectura Limpia, SRP, PHAME)

DEUDA TÉCNICA TOTAL ESTIMADA

933,528.31 horas

Calculado sobre la totalidad del entorno.

COSTO TOTAL DE REPARACIÓN

\$ 18,670,566.25

Basado en salario base operativo.

VARIABLES GLOBALES (CONFIG)

- Factor Corrector (K): 0.01
- Salario Promedio: \$20 / hora
- Jornada Laboral: 160 horas / mes

Estado del Proyecto: Altamente Mantenible

La refactorización arquitectónica implementada mitigó de manera proactiva costos técnicos futuros, consolidando una base de código estructurada y escalable.

Archivos Críticos de la Aplicación (Top 5 Deuda)

Archivo	LOC	G	MI	Deuda	Costo	ROI
api/wallet_adapters/mercadopago_adapter.py	442	67	1.93	322.95 hs	\$6459.03	-56.6%
js/scanner.js	1309	400	0.00	981.75 hs	\$19635.00	-85.7%
js/accounts.js	912	280	0.00	684.00 hs	\$13680.00	-79.5%
js/transactions.js	481	86	0.00	360.75 hs	\$7215.00	-61.2%
js/goals.js	486	99	0.00	364.50 hs	\$7290.00	-61.6%

* Nota: El reporte detallado adjunto se concentra exclusivamente en el código base de la aplicación (directorios api/ y js/), excluyendo las dependencias del entorno virtual (site-packages) para mayor precisión operativa.
